B) Report

i. Title: Essay Writing Competition on Energy Conservation

ii. Introduction:

Essay writing plays a vital role in shaping students' ability to express their thoughts, emotions, and viewpoints about the world around them. It allows them to explore a wide range of subjects-such as history, science, literature, mathematics, and the arts-while developing essential critical thinking skills. Through the process of crafting essays, students learn to present coherent arguments supported by relevant evidence, a competency valuable both in academic settings and in everyday life.

In addition, essay writing enhances written communication skills, encouraging clarity, creativity, and logical structure. To highlight the importance of these skills and promote awareness about sustainable practices, the Department of Physics and Electronics organized an Essay Writing Competition on Energy Conservation as part of Energy Conservation Week 2024 (14th to 20th December). The competition was held on 19th December 2024 and aimed to inspire students to reflect on and contribute to the global dialogue on energy conservation.

iii. Objectives of the Essay Writing Competition:

- To enhance students' writing skills, including grammar, spelling, punctuation, and sentence structure.
- To encourage students to engage in research and support their ideas with facts and evidence.
- To foster critical thinking and the ability to formulate strong, well-reasoned arguments.
- To improve students' reading comprehension and analytical abilities through essay writing.

iv. Details of Participants:

A total of 49 students participated in the essay writing competition, including 6 male and 43 female students.

v. Brief Summary of Essay Writing Competition:

As part of Energy Conservation Week 2024 (14th to 20th December), the Department of Physics and Electronics organized an Essay Writing Competition to raise awareness about the importance of energy conservation and to promote sustainable practices among students. The competition provided a platform for participants to

express their thoughts on topics such as energy efficiency, renewable energy sources, and innovative strategies to reduce energy consumption.

The event aimed to encourage critical thinking, creativity, and a deeper commitment to environmental sustainability. A total of 49 students (6 male and 43 female) submitted essays, showcasing their knowledge, insight, and concern for the pressing issues surrounding energy use and conservation.

Essays were judged based on originality, relevance, and clarity of expression. The evaluation was carried out by Dr Kakasaheb Raut, Associate Professor of Zoology, and Mr. Shivraj Kache, Assistant Professor of Marathi, who served as the examiners for the competition.

Participants with outstanding entries were recognized for their insightful perspectives and valuable contributions to the cause of energy conservation.
