B) Report

i. Title: Guest Lecture on Recent trends in Fishery Sciences

ii. Introduction:

The Department of Zoology and Fishery Science organized a Guest Lecture on "Recent Trends in Fishery Sciences" with the aim of communicating scientific knowledge and stimulating discussion among students and faculty members. Fisheries science is one of the most dynamic and rapidly advancing fields today, integrating innovations from biotechnology, environmental science, genetics, nutrition, and aquaculture management. With the increasing global demand for sustainable fish production and conservation of aquatic resources, modern approaches such as Recirculatory Aquaculture Systems (RAS), biofloc technology, genetic improvement of fish species, advanced disease diagnostics, nutraceutical feeds, and climate-resilient aquaculture practices are transforming traditional fishery methods into more efficient and eco-friendly systems.

This lecture was conducted to provide students, researchers, and professionals with valuable insights into these emerging developments and their practical applications in fisheries and aquaculture.

iii. Objectives of the Programme:

1. To enhance awareness among students and faculty regarding the latest developments and innovations in fishery sciences.
2. To understand emerging technologies such as biofloc, Recirculatory Aquaculture Systems (RAS), integrated aquaculture, and genetic improvement in fish breeding.
3. To explore sustainable aquaculture and fisheries management practices in response to climate change and environmental challenges.
4. To bridge the gap between theoretical knowledge and practical applications in modern fish production and resource management.
5. To encourage research and innovation among students in the areas of fish nutrition, health management, and aquatic biodiversity conservation.

iv. Details of Participants:

A total of 32 students participated in the programme, including 22 female and 10 male students.

v. Brief Summary of the Event:

The Department of Zoology and Fishery Science organized a one-day Guest Lecture on "Recent Trends in Fishery Sciences" to communicate scientific knowledge and stimulate discussion and debate. The programme began with the inauguration and welcome of the resource person Mr. Amit Jadhav, who was felicitated by Dr. D. Rathod along with other staff members. The session was interactive and informative, covering recent technological advancements and sustainable practices in fisheries and aquaculture.

vi. Outcomes of the Scientific Talk:

1. The session encouraged students to develop interest in research and higher studies in the field of fisheries and aquatic sciences.
2. Participants gained valuable insights into career opportunities and emerging trends in the national and global fishery sectors.
3. Interaction with the expert helped students develop a scientific outlook and inspired curiosity toward modern challenges in aquatic resource management.
