w.e.f. June, 2024 (In Accordance with NEP-2020)

Review Statement

The NEP Cell reviewed the Curriculum of **B.Sc. (Honors/Research) in Microbiology** Programme to be effective from the **Academic Year 2023-24.** It was found that, the structure is as per the NEP-2020 guidelines of Govt. of Maharashtra.

CERTIFICATE

I hereby certify that the documents attached are the Bonafide copies of the Curriculum of **B.Sc. (Honors/Research) in Microbiology** Programme to be effective from the **Academic Year** 2024-25.

Date: 20-03-2024

Place: Latur

From the Desk of the Chairperson...

The National Education Policy lays particular emphasis on the development of the creative potential of each individual. NEP-2020 has conceptualized the idea to develop well rounded competent individuals for making the nation a self-reliant and global leader.

Department of Microbiology has developed a curriculum framework to encompass the goals of NEP 2020. Microbiology is study of microorganisms such as bacteria, protozoa, algae, fungi, viruses, etc. These studies integrate cytology, physiology, ecology, genetics and molecular biology, evolution, taxonomy and systematics with a focus on microorganisms. It is one of the significant branches of sciences to understand the principles of life which has roots in the study of various microbial systems. Microbiology has been at the forefront of research in industry, environment, agriculture, food, dairy, medicine and biology. It is one of the rapidly growing and applied areas of the science. Many job opportunities available for student in this stream. Trained manpower is required in industrial production of microbial products. Considering rural and agro based life background and awareness about the general health and hygiene , our curriculum is designed to educate our students in various important microbiological domains, as well as to promote and develop skills and competencies that have great value.

> (**Dr. K. G. Maske**) Chairperson Board of Studies in Microbiology

Programme Outcomes (POs) for B.Sc. Programme						
After the comp	After the completion of the B.Sc. programme, a student will have obtained:					
PO 1	Disciplinary Knowledge					
	Comprehensive knowledge of science subjects which constitute the graduate programme and execution of scientific knowledge in the specific area.					
PO 2	Scientific Outlook					
	The qualities of a science graduate such as observation, precision, analytical mind, logical thinking, clarity of thought and expression and systematic approach.					
PO 3	Self-Directed Life-long Learning					
	Ability to appear for various competitive examinations or choose the post graduate programme or other related programme of their choice.					
PO 4	Research Skills					
	Functional knowledge and applications of instrumentation and laboratory techniques to do independent experiments, interpret the results and develop research ethos.					
PO 5	Problem Solving Skills					
	Analytical and logical skills and critical thinking to extract information from qualitative and quantitative data, formulate and solve problems in a systematic and rational manner.					
PO 6	Professional Competence and Ethics					
	Aptitude and skills to perform the jobs in diverse fields such as science, engineering, industries, survey, education, banking, development and planning, business, public service, self-business etc. with human rationale and moral values.

Progra	Programme Specific Outcomes (PSOs) for B.Sc. Microbiology (Honors/Research)				
PSO No.	Upon completion of this programme the students will be able to				
PSO 1	Academic Competence				
	Comprehensive knowledge in the underlying principles of Microbiology, basics in Microbiology and Biomolecules, Methods, Microbial nutrition and growth, fundamentals of immunology, Environmental Microbiology, Production of Biofertilizer, Agricultural Microbiology.				
PSO 2	Scientific Outlook				
	Scientific temperament with the help of experiments and practicals in Microbiology such as observation of microorganism through microscope, use of microbial techniques, experiments to test physiochemical factors, perform hematological procedures				
PSO 3	Personal and Professional Competence				
	Competence to do awareness about hematological, microorganisms and causation of diseases, environmental, agricultural issues and can work to solve the environmental issues with the help of knowledge in Microbiology.				
PSO 4	Entrepreneu <mark>rial Competence</mark>				
	Capacity to move in the start-up of bio fertilizer, pathology lab, Food Fermentation, Production of Probiotics for good health, medical services or work for the conservation of environment or can work in such organizations.				
PSO 5	Research Competence				
	An ability to work over minor and preliminary research in human health, environmental issues, production of various secondary metabolites of human benefit by fermentation processes and other related issues.

Department of Microbiology

Course Type: DSC-V Course Title: Applied Microbiology Course Code: 201MIB 3101 Credits: 03

Max. Marks: 75

Lectures: 45 Hrs.

Learning Objectives:

- LO 1. To study presence of microorganisms in air and Microbiological Analysis of Air.
- LO 2. To learn the subject in perspective of public health and hygiene.
- LO 3. To know techniques to control microbial contamination in air, water and food.
- LO 4. To study different types of treatment for domestic, municipal and industrial waste.

Course Outcomes:

After completion of the course, students will be able to-

- CO 1. Describe the importance of existence of microorganisms in air and method of analysis.
- CO 2. Explain bacteriological evidence of fecal pollution of water.
- CO 3. Apply sewage treatment in domestic, municipal and industrial waste.
- CO 4. To explain microbial spoilage food and milk and food Preservation techniques

Unit	Title of Unit & Contents	Hrs.	
No.			
Ι	Air Microbiology	10	
	1. Definition, composition and quality of air.		
	2. Sources of microorganisms in air: Indoor and outdoor microflora.		
	3. Importance of state of suspension- Bioaerosols: droplet, droplet		
	nuclei and droplet infection.		
	4. Significance of microorganisms present in air: With respect to human		
	health (list of air borne diseases).		
	5. Microbiological Analysis of Air: Solid and liquid impingement,		
	Anderson air sampler.		
	6. Control of microorganisms in air: Dust control, UV radiation, laminar		
	airflow system, masks, Bactericidal vapours.		
	Unit Outcomes:Autonomous		
	UO 1. Student will be able describe water borne diseases and safety of		
	drinking water.		
	UO 2. Student will explain spread of microorganisms in air and air		
	borne diseases .		

Unit No.	Title of Unit & Contents	Hrs.
II	UNIT II: Water Microbiology	12
	1. Natural waters: Atmospheric, surface, stored and ground water.	
	Definitions: Fresh water (ponds, lakes, streams) and Marine water	
	(estuaries, the sea).	
	2. Aquatic environment: Temperature, hydrostatic pressure, light,	
	3 Domestic water: water borne diseases, nuisance microorganisms.	
	4 Bacteriological evidence of pollution: Fecal pollution significance	
	of indicator microorganisms.	
	5. Microbiological examination of water: Membrane filter technique,	
	Tests for presence of coliforms (quantitative and qualitative), IMVC	
	test, Elevated temperature test.	
	6. Safety of drinking water: Boiling, chlorination, radiation and	
	ozonization	
	Unit Outcomes:	
	UO 1. Student will be able to explain water borne diseases and safety of	
	drinking water.	
III	Waste water microbiology	13
	1. Sewage: Definition, composition and strength: BOD, COD.	
	2. Sewage treatment: (physical, biological and shemical Ovidetion pende, solideprocessing	
	Composting)	
	3. Domestic sewage treatment	
	4. Municipal sewage treatment	
	5. Industrial waste treatment	
	Unit Outcomes:	
	UO 1. Stud <mark>ent will be</mark> able to describe sewage treatment methods.	
IV	Food and milk microbiology	10
	1. Sources of microorganisms in foods and milk.	
	2. Milk as a nutrient medium for microbial growth.	
	3. Starter culture-Lactic acid bacteria.	
	4. Microbiological examination of food: DMC, SPC, Differential	
	5 Food Spoilage: Classification of foods depending upon ease of	
	spoilage Different types of spoilages with suitable examples	
	biochemical types of microorganisms in milk.	
	6. Principles and applications of food Preservation techniques:	
	Asepsis, use of high temperatures (milk pasteurization and	
	phosphatase test, canning), freezing, dehydration, radiation (UV	
	and Gamma rays), osmotic pressure; use of chemicals- Vinegar,	
	Benzoic acid.	
	7. Food borne diseases: Staphylococcal poisoning and Salmonellosis.	

Unit No.	Title of Unit & Contents	Hrs.
	Unit Outcomes:	
	UO 1. Student will apply this To explain microbial spoilage food and	
	milk and food Preservation techniques.	

Learning Resources:

Department of Microbiology

Course Type: Lab Course Course Title: Lab Course –V (Based on DSC-V) Course Code: 201MIB3103

Credits: 01

Max. Marks: 50

Hours: 30

Learning Objectives:

- LO 1. To study methods used for bacteriological analysis of water.
- LO 2. To study methods used for bacteriological analysis of air.
- LO 3. To study methods used for bacteriological analysis of soil, food and milk.

Course Outcomes:

After completion of the course, students will be able to-

- CO 1. Perform microbiological analysis Air
- CO 2. Perform microbiological analysis of Water.
- CO 3. Perform microbiological analysis of Milk
- CO 4. Perform quantitative microbiological analysis of food.

Practical No.	Unit
1	Microbial analysis of air from –hospital environment.
2	Microbial sampling of air for fungi by solid impingement techniques
3	Bacteriological examination of water for potability - Quantitative analysis: MPN
4	Bacteriological examination of water for potability –Qualitative: Presumptive, confirmed, completed test
5	Test for fecal coliforms: IMViC tests
6	Test for fecal coliforms: Elevated temperature tests
7	Bacteriological analysis of milk: Reductase test: MBRT
8	Microbial analysis of air from – public places
9	Microbial sampling of air from industrial Area.
10	Microbial analysis of fermented food.
11	Microbial analysis of spoiled food.
12	Visit to municipal sewage treatment plant and prepare report.

N.B.: Any Ten Practical from above.

Learning Resources:

Department of Microbiology

Course Type: DSC-VI

Course Title: Fundamentals of Immunology

Course Code: 201 MIB3102

Credits: 03

Max<mark>. Ma</mark>rks: 75

Lectures: 45 Hrs.

Learning Objectives:

- LO 1. To understand basic principles of immunology and microbial interactions with relationship.
- LO 2. To understand antigen, antibody and complement system.
- LO 3. To learn overview of Immunity and immune responses.
- LO 4. To understand antigen antibody reaction and their applications.

Course Outcomes:

After completion of the course, students will be able to-

- CO 1. Explain the host microbe interactions.
- CO 2. Describe the antigen and antibodies.
- CO 3. Describe the immunological concepts with reference to immunity.
- CO 4. Apply serological reactions for diagnosis of the diseases.

Unit No.	Title of Unit & Contents	Hrs		
Ι	Humans- Microbe interactions	10		
	1. Definitions – contamination, infection and disease,			
	pathogen, pathogenicity and virulence.			
	2. Overview of human microbial interactions commensalism, mutualism,			
	parasitism with examples			
	3. Aggressive factors of the pathogens			
	4. Microbiome of human body and its importance:			
	a) skin,			
	b) oral cavity,			
	c) Gut			
	1) surger annu surger ()			
	Unit Outcomes:			
	UO 1.Student will explain role of normal flora of the host.			
	UO 2 Student will describe aggressive factors of pathogens			
	e o 2. Student will deserve aggressive inclois of pullogens			
II	Antigen and Antibody	12		
	1. Antigen :Definition, Immunogenicity versus antigenicity			
	2. General properties of antigen.			
	3. Antigen specificity.			
	4. Bacterial antigens with special reference to antigens of Salmonella			
	typhi.			

Unit Outcomes: UO 1. Student will be able to describe antigens. UO 2. Student will be able to describe antibodies. III Immunity and Immunization 13 1. Definition and classification of immunity with suitable examples. 2. Immune response: Humoral and cellular 3. Theories of antibody production
UO 1. Student will be able to describe antigens. UO 2. Student will be able to describe antibodies.13IIIImmunity and Immunization131. Definition and classification of immunity with suitable examples. 2. Immune response: Humoral and cellular 3. Theories of antibody production13
III Immunity and Immunization 13 1. Definition and classification of immunity with suitable examples. 2. 2. Immune response: Humoral and cellular 3. 3. Theories of antibody production 13
Infinitulity and infinitulization 13 1. Definition and classification of immunity with suitable examples. 2. Immune response: Humoral and cellular 3. Theories of antibody production 4
 Definition and classification of minutify with suitable examples. Immune response: Humoral and cellular Theories of antibody production
3. Theories of antibody production
5. Theories of antibody production
4 Hypersensitivity: types of hypersensitivity in brief
5. Immunization-Active and passive immunization.
6. Designing vaccines for active immunization
i. Live attenuated vaccines.
ii. Inactivated or killed vaccine.
iii. Subunit vaccine.
iv. Toxoid.
v. Recombinant DNA vaccine
7. Immunesera.
Unit Outcomes:
UO 1. Student will be able to explain Immune responses
UO 2. Student will be able to explain Immunization process.
IV Antigen antibody reactions 10
1. General features of antigen antibody reactions.
2. Mechanism of Precipitation and agglutination.
3. Applications of precipitation reactions
4. Applications of agglutination reactions
5. Immunodiffusion
6. Immunoelectrophoresis
7. Complement fixation test.
8. Neutralization: toxin and virus neutralization
9. Enzyme linked immunosorbent assay.
Unit Outcomes:
UO 1. Student will be able to describe antigen antibody reactions.
UO 2. Student will be able to application of antigen antibody
reactions
Rajarshi Shahu Mahavidvalava.

Learning Resources:

- 1.Basic Immunology by Joshi and Osarano. Agrobotanical publishers Ltd. Bikaner.
- 2. Elementary Microbiology Vol. I and II Dr. A. H Modi. Akta Prakashan. Nadiad.

Department of Microbiology

Course Type: SEC-III Course Title: Production of Bio fertilizers Course Code: Credits: 02 Max

Max. Marks: 50

Lectures: 30 Hrs.

Learning Objectives:

- LO 1. To create awareness about organic farming.
- LO 2. To inculcate skills for mass production of bio fertilizers
- LO 3. To promote self-employment.
- LO 4. To promote ecofriendly and sustainable agro practices

Course Outcomes:

After completion of the course, students will be able to-

- CO 1. Types of Bio-fertilizers and their importance
- CO 2. Explain Rhizosphere & plant growth promoting substances
- CO 3. Explain role of Nitrogen Fixing Bacteria
- CO 4. Describe Bio-fertilizer production

Unit No.	Title of Unit & Contents	Hrs.
Ι	Organic farming and importance of bio fertilizers	4
	1. Organic Farming for sustainable development	
	2. Importance of Bio-fertilizer	
	3. Types of Bio-fertilizers	
	Unit Outcomes: Student will be able to UO.1 Explain importance of organic farming UO.2 Explain importance of bio fertilizers	
II	Plant Growth Promoting Rhizobacteria	5
	 Rhizosphere. Direct plant growth promotion Microbial plant growth promoting substances: Indole-acetic acid, gibberellic acid. 	
	Unit Outcomes: Students will be able to	
	UO 1. Describe the role of microorganisms in plant growth promotion.	
III	Study of Nitrogen Fixing Bacteria: Rhizobium and Azotobacter	6
	 Free living nitrogen fixing bacteria Study of <i>Azotobacter</i> species Study of <i>Rhizobium</i> species 	
	Unit Outcomes: Students will be able to	
	UO.1 Describe the importance of <i>Azotobacter</i> and <i>Rhizobium</i> species for improving soil fertility	
IV	Laboratory Production of the Biofertilizer	15
	1. Isolation and characterization of <i>Rhizobium</i>	

- 2. Isolation and characterization of *Azotobacter*
- 3. Isolation and characterization of Indole-acetic acid producing Bacteria
- 4. Isolation of PSB and characterization
- 5. Mass production of bio-fertilizers

Unit Outcomes: Students will be able to

UO.1 Design experiment for the production of Bio-fertilizer

Learning Resources:

- 1. A textbook of Microbiology, Dubey R. C. and D. K. Maheshwary. (2012), S Chand and Company. New Delhi, India.
- 2. Introduction to soil Microbiology, Alexander Martin, John Wiley and Sons.N.Y.
- 3. Microbial biotechnology: fundamentals of applied microbiology. Alexander Glazer, Hiroshi Nikaido. Cambridge university press
- 4. Kannaiyan, S. (2003). Biotechnology of Bio fertilizers, CHIPS, Texas.
- 5. Mahendra K. Rai (2005). Hand book of Microbial bio fertilizers, The Haworth Press, Inc.New York.
- 6. Reddy, S.M. (2002). Bio inoculants for sustainable agriculture and forestry, Scientific Publishers.

Department of Microbiology

Course Type: Lab Course				
Course Title: Lab Course –IV (Based on DSC-VI)				
Course Code: 201MIB2104				
Credits: 01	Max. Marks: 50	Hours: 30		

Learning Objectives:

- LO 1. To study host microbe interaction and virulence factors of pathogens.
- LO 2. To study isolation and identification of pathogens
- LO 3. To study serological test used for diagnosis of diseases
- LO 4. To study staining for WBC and total count.

Course Outcomes:

After completion of course the student will be able to-

- CO 1. Perform haematological procedures for detection of blood groups.
- CO 2. Perform diagnosis of diseases.
- CO 3. Perform differentiate blood staining
- CO 4. Perform experiment to determine presence of virulence factors of pathogens

Practical No.	Unit
1	Isolation of normal bacterial flora of human body.
2	Study of virulence factors of –Coagulase, capsule staining,
3	Study of haemolysins.
4	Determination of iso antigens on human RBC: Blood grouping
5	Serodiagnosis of Typhoid fever : Widal test.
6	RPR test.
7	Immuno diffusion test.
8	Differential blood staining for WBC
9	Differential count of leucocytes.
10	Western blot test (Demonstration)

Learning Resources:

- 1. Handbook of media, stains and reagents in microbiology, A. M. Deshmukh, PAMA publication, Karad, 1997
- 2. Microbiology, Singh R.P., Kalyani Publication.
- 3. Practical Microbiology, Dubey, Maheshwari, S. Chand, 2022
- 4. Microbiology, Yadav Manju, Discovery Publishing House, New Delhi
- 5. Biochemical Methods, s. Sadasivam and A. Manickam, New age international publishers, 2008

- 6. Handbook of Microbiology, P. S. Bisen and Kavita Verma, CBS publishers and distributors, new Delhi,2007
- 7. Modern Tools and Techniques to Understand Microbes, Ajit Varma, Arun Kumar Sharma, Springer International Publishing, 2017.
- 8. Handbook of media, stains and reagents in microbiology, A. M. Deshmukh, PAMA publication, Karad, 1997

Rajarshi Shahu Mahavidyalaya, Latur

(Autonomous)

Department of Microbiology

Course Type: DSC-VII Course Title: Environmental microbiology Course Code: 201MIB4101 Credits: 03 Max

Max. Marks: 75

Lectures: 45 Hrs.

Learning Objectives:

- LO 1. To study interrelationship and influence of microorganisms on each other and on environment.
- LO 2. To learn eco-friendly and sustainable microbial techniques to solve agroenvironmental problems.
- LO 3. To study role of microorganisms in turnover of elements in the environment.
- LO 4. To study role of microorganisms in plant growth promotion and plant disease management.

Course Outcomes:

After completion of the course, students will be able to-

- CO 1. Explain microbial interactions and their role in environment.
- CO 2. Describe the influence of microbial interactions on environment and development of an ecosystem.
- CO 3. Demonstrate that microorganisms have an indispensable role in turnover of elements in the environment.
- CO 4. Advocate the role of microorganisms in plant growth promotion and plant disease management

Unit No.	Title of Unit & Contents	Hrs.
Ι	Microbial Ecology and interactions	12
	 Microbial ecology: Ecosystem, Synecology, Autecology, population, community (Autochthonous, Allochthonous), Dispersal :(Center, Active, Passive) Community succession (Pioneer, Successive, Climax), Adaptation (Phenotypic, Genotypic) Symbiosis: Definition and functions Types of associations: neutralism, Commensalism, Mutualism (Lichens, Mycorrhiza) Competition, Antibiosis, Synergism, and Parasitism. (Definitionand example of each). 	
	Unit Outcomes: Unit Outcomes: Students will be able to	
	UO 1. Types of microbial interactions and Community succession.	

Unit No.	Title of Unit & Contents	Hrs.
II	Plant growth promoting rhizobacteria	12
	 Rhizosphere. Direct plant growth promotion: Microbial plant growth promoting substances: Indoleacetic acid, gibberellicacid. Indirect plant growth promotion –Biocontrol. Competition for an ecological niche. Suppression of growth of soil-born phytopathogens by producing allelochemicals Induction of systemic resistance (ISR). 	
	Unit Outcomes: Students will be able to	
III	UO 2. Describe the role of microorganisms in plant growth promotion. Soil microbiology : Microbial transformation of C N,S,P in soil	11
	 Soil environment: Structure and texture of soil, Organic fraction of soil (Humus),Soil as growth medium for microorganisms. Carbon cycle: Cycle, Mineralization- cellulose, Starch (Microbiology andenzymology), Carbon assimilation. Nitrogen cycle: Cycle, Nitrogen fixation(Symbiotic, Non symbiotic, Nitrogenase), Mineralization of proteins, Ammonification, Nitrification,Denitrification,. Sulfur cycle Phosphorus cycle. Unit Outcomes: Students will be able to UO 1. Describe Microbial transformation of C N,S,P in soil. 	
IV	Bioremediation	10
	 Soil contamination- Xenobiotics Bioremediation: Definition and principle. Microbial Populations for Bioremediation Processes. Types of Bioremediation: In situ bioremediation, Ex situ bioremediation. Advantages and disadvantages of Bioremediation Unit Outcomes: Students will be able to UO 1. Explain methods for decontamination of soil 	

Learning Resources:

- 1. Introduction to soil Microbiology, Alexander Martin, John Wiley and Sons.N.Y.
- 2. Soil Microorganisms and plant growth. Subba Rao N.S, Oxford and IBH publishing Co. Pvt. Ltd.
- 3. Microbiology. Pelczar, Chan and Crieg. TATA MCGRAW-HILL
- 4. Text book of applied microbiology. Dr. B.M Sandikar, Himalaya Publishing House
- 5. Microbial biotechnology: fundamentals of applied microbiology. Alexander Glazer, Hiroshi Nikaido. Cambridge university press

- 6. Review on Bioremediation of Polluted Environment: A Management Tool: Kumar.A, Bisht.B.S, Joshi.V.D, Dhewa.T. International journal of environmental sciences. Volume 1, No 6, 2011
- 7. Environmental microbiology. Ralph Mitchell, Ji-Dong Gu. Wiley-Blackwell
- 8. Biochemistry, 4th edn. Dubuque, IO: William C Brown
- 9. Handbook of Biochemistry and Molecular Biology
- 10. Biochemistry, 3rd Edition, by Drs. John W. Pelley, and Edward F. Goljan.
- 11. The Cell: A Molecular Approach by Geoffrey M. Cooper, and Robert E. Hausman

Rajarshi Shahu Mahavidyalaya, Latur

(Autonomous)

Department of Microbiology

Course Type: Lab Course Course Title: Lab Course VII (Based on DSC VII) Course Code: 201MIB4103 Credits: 01 Max. Marks: 50

Hours: 30

Learning Objectives:

- LO 1. To study microbial succession.
- LO 2. To study influence of plant on soil microorganisms.
- LO 3. To study ammonification and nitrification process.
- LO 4. To study nitrogen fixing microorganisms in soil.

Course Outcomes:

After completion of the course, students will be able to -

- CO 1. Demonstrate microbial succession with reference to raw milk.
- CO 2. Demonstrate production and analysis of plant growth promoting substances.
- CO 3. Obtain nitrogen fixing microorganisms in pure culture.
- CO 4. Obtain starch degrading bacteria from soil.

Practical No.	Unit
1	Study of microbial succession in raw milk.
2	Study of rhizosphere effect- R: S ratio.
3	Isolation of rhizospheric bacteria showing biocontrol potential.
4	Isolation of starch degrading bacteria.
5	Demonstration of Ammonification, Nitrification and Denitrification.
6	Demonstration of i) Nitrate reduction and ii) Sulfate reduction .
7	Isolation and study of <i>Rhizobium</i> species from root nodules of leguminous plants.
8	Isolation and study of Azotobacter sp. from soil.
9	Chemical analysis of soil.(Demonstration)
10	Determination of BOD and COD of sewage water. (Demonstration).

Learning Resources:

- 1. Handbook of media, stains and reagents in microbiology, A. M. Deshmukh, PAMA publication, Karad, 1997
- 2. Microbiology, Singh R.P., Kalyani Publication.
- 3. Practical Microbiology, Dubey, Maheshwari, S. Chand, 2022
- 4. Microbiology, Yadav Manju, Discovery Publishing House, New Delhi
- 5. Biochemical Methods, s. Sadasivam and A. Manickam, New age international publishers, 2008
- 6. Handbook of Microbiology, P. S. Bisen and Kavita Verma, CBS publishers and distributors, new Delhi,2007
- 7. Modern Tools and Techniques to Understand Microbes, Ajit Varma, Arun Kumar Sharma, Springer International Publishing, 2017

Department of Microbiology

Course Type: DSC-VIII Course Title: Medical Microbiology Course Code: 201MIB 4102 Credits: 03

Max. Marks: 75

Lectures: 45 Hrs.

Learning Objectives:

- LO 1. To gain knowledge about disease process and kinds of diseases
- LO 2. To study reservoirs of infection and modes of transmission of infections.
- LO 3. To study diseases caused by bacterial pathogens.
- LO 4. To study diseases caused by viral pathogens and parasites.

Course Outcomes:

After completion of the course, students will be able to-

- CO 1. Describe an integral role of microorganisms in causation of diseases.
- CO 2. Explain sources of infection and modes of transmission of infections
- CO 3. Execute precautions to avoid the spread of viral diseases
- CO 4. Describe antimicrobial, immunological and diagnostic methodologies used in disease treatment and prevention.

Unit	Title of Unit & Contents	Hrs.
No.		
Ι	Disease process and kinds of diseases	12
	1. Kinds of diseases .	
	2. Infections : terms used to describe different types of infections.	
	3. Disease process, signs, symptoms and syndrome.	
	4. Epidemiology-epidemic, endemic, pandemic, sporadic	
	5. Sources of infection.	
	6. Modes of disease transmission, carriers and their types.	_
	Unit Outcomes: Students will be able to	
	UO 1. Describe the different kinds of diseases and infections.	
II	Study of bacterial diseases	12
	1.Introduction and definitions: Etiology, pathogenesis, Symptomatology, laboratory	
	diagnosis, epidemiology, prophylaxis	
	2. Typhoid	
	3.Cholera	
	4. Tuberculosis	_
	Unit Outcomes: ans a share when a share we have a share we hav	
	UO 1. Explain about preventive measures of diseases.	
III	Study of the Fungal and mosquito borne diseases	11
	Etiology, pathogenesis, Clinical features, laboratory diagnosis,	
	epidemiology, treatment and prophylaxis of the following	
	1.Candidiasis	
	2.Malaria	

Unit	Title of Unit & Contents	Hrs.
No.		
	3.Dengue	
	Unit Outcomes: Students will be able to	
	UO 1. Describe about preventive measures of diseases.	
IV	Study of following viral diseases	10
	1.Hepatitis	
	2.AIDS	
	3.COVID 19	
	Unit Outcomes:]
	UO 1. Explain about causative agent, epidemiology and preventive measures.	

Learning Resources:

- 1. Medical Microbiology. N.C.Dey and T.K. Dey. Allied agency, Culcutta.
- 2. Microbiology by Davis, Dulbecco, Eisen Harper and Row Maryland.
- 3. Text book of Microbiology by R. Anantharayanan, C.K. Jayaram Panikar, OrientLongman, Mumbai.
- 4. Medical microbiology by Chakraborthy.
- 5. Medical Microbiology: Prep Manual for Under Graduates by Nagoba, Elsevier
- 6. Manual of Clinical Microbiology, Karen C. Carroll (Editor), Michael A. Pfaller ASM publications.
- 7. Essentials of Medical Microbiology by Apurba Sankar Sastry and Sandhya Bhat K, Jaypee Brothers Medical Publishers
- 8. Basic Medical Microbiology E-Book, Patrick R. Murray . 2017 Els, evier Health Sciences

Course Type: Lab Course Course Title: Lab Course VIII (Based on DSC VIII) Course Code: 201MIB4104 Credits: 01 Max. Marks: 50

Hours: 30

Learning Objectives:

- LO 1. To study microscopic diagnosis of tuberculosis and malaria.
- LO 2. To study causative agent of typhoid fever.
- LO 3. To study causative agent of cholera.

Course Outcomes:

After completion of course the student will be able to-

- CO 1. Perform diagnosis of tuberculosis and malaria.
- CO 2. Perform laboratory diagnosis of typhoid.
- CO 3. Perform laboratory diagnosis of cholera.
- CO 4. Determine antibiotic resistance of pathogens

Practical No.	Unit
1	Microscopic diagnosis of tuberculosis by acid fast staining.
2	Microscopic diagnosis of malaria by blood smear method.
3	Study of biochemical reactions for identification of pathogen.
4	Study of morphological and cultural characteristics of Salmonella species.
5	Study of biochemical characteristics of Salmonella species
6	Study of morphological and cultural characteristics of Vibrio cholera.
7	Isolation of <i>Candida albicans</i> from diabetic lesions.
8	Antibiotic sensitivity test for pathogens by disc diffusion method

Learning Resources:

- 1. Handbook of media, stains and reagents in microbiology, A. M. Deshmukh, PAMA publication, Karad, 1997
- 2. Microbiology, Singh R.P., Kalyani Publication.
- 3. Practical Microbiology, Dubey, Maheshwari, S. Chand, 2022
- 4. Microbiology, Yadav Manju, Discovery Publishing House, New Delhi
- 5. Biochemical Methods, s. Sadasiyam and A. Manickam, New age international publishers, 2008

Course Type: SEC-IV Course Title: Single cell protein production technology Course Code: Credits: 02 Max. Marks: 50

Lectures: 30 Hrs.

Learning Objectives:

- LO 1. To study importance of Single cell protein forHuman health.
- LO 2. To study application Yeast as protein source
- LO 3. Understand technology of SCP production
- LO 4. To study other metabolites produced by yeast.

Course Outcomes:

After completion of the course, students will be able to-

- CO 1. Describe importance SCP
- CO 2. Demonstrate SCP production method
- CO 3. Demonstrate analysis of SCP product
- CO 4. Gain practical insights for enterpreunership

Unit No.	Title of Unit & Contents	Hrs.
Ι	Introduction : Single cell protein	8
	1 Single cell protein : Introduction	
	2 Source of SCP	
	2. Source of SCF	
	5. Saccharomyces cerevisiae: importance, cen morphology and chemical	
	composition.	
	4. Spirullina: importance, cell morphology and chemical composition.	
	Unit Outcomes:	
	UO 1. Students able to explain importance of SCP	
II	Technology for production of SCP	7
	1. Primary screening of Yeast	
	2. Secondary screening of yeast and cultivation	
	Unit Outcomes:	
	UO 1. Students able to explain role of Saccharomyces cerevisiae as SCP	
III	Production of SCP	8
	1. Search for raw material for production of SCP	
	2. Fermentative production	
	3. Formulation and testing	

	Unit Outcomes:	
	UO 1. Students able to demonstrate production of SCP	
IV`	Spirulina as a source of SCP	7
	1. Spirulina: occurrence and study of morphological characteristics	
	2. Laboratory Cultivation	
	Unit Outcomes:	
	UO 1. Students able to explain Spirulina as a source of SCP.	
V	Practicals (Included in above 04 units)	
	1. Primary screening of Saccharomyces cerevisiae strains from food	
	2. Secondary screening of Saccharomyces cerevisiae	
	3. Primary screening of Spirulina strains.	
	4. Cultivation of Saccharomyces cerevisiae	
	5. Cultivation of Spirulina strains.	
	Chemical analysis of SCP- Protein, Nucleic acid and carbohydrate.	

Learning Resources:

- 1. Industrial Microbiology. Patel, A.H. (2008). MaCmillan Publication, New Dehli.
- 2. Principal of Fermentation Technology.Stanbuzy,Peter & Whitaker, A. (2008). ButterworthHeinemann.
- 3. Industrial Microbiology. Casida L.E. (2005). New age International Publishers
- 4. Fermentation Technology. Srivastava, M.L.
- 5. Singh, B.D. (2008). Biotechnology. New age International.

UG First Year

Extra Credit Activities

Sr. No.	Course Title	Credits	Hours		
			T/P		
1	MOOCs	Min. of 02 credits	Min. of 30 Hrs.		
2	Certificate Courses	Min. of 02 credits	Min. of 30 Hrs.		
3	IIT Spoken English	Min. of 02 credits	Min. of 30 Hrs.		
	Courses				

Guidelines:

Extra -academic activities

- 1. All extra credits claimed under this heading will require sufficient academic input/ contribution from the students concerned.
- 2. Maximum 04 extra credits in each academic year will be allotted.
- 3. These extra academic activity credits will not be considered for calculation of SGPA/CGPA but will be indicated on the grade card.

Additional Credits for Online Courses:

- 1. Courses only from SWAYAM and NPTEL platform are eligible for claiming credits.
- 2. Students should get the consent from the concerned subject Teacher/Mentor/Vice Principal and Principal prior to starting of the course.
- 3. Students who complete such online courses for additional credits will be examined/verified by the concerned mentor/internal faculty member before awarding credits.
- 4. Credit allotted to the course by SWAYAM and NPTEL platform will be considered as it is.

Additional Credits for Other Academic Activities:

- 1. One credit for presentation and publication of paper in International/National/State level seminars/workshops.
- 2. One credit for measurable research work undertaken and field trips amounting to 30 hours of recorded work.
- 3. One credit for creating models in sponsored exhibitions/other exhibits, which are approved by the concerned department.
- 4. One credit for any voluntary social service/Nation building exercise which is in collaboration with the outreach center, equivalent to 30 hours
- 5. All these credits must be approved by the College Committee.

Additional Credits for Certificate Courses:

1. Students can get additional credits (number of credits will depend on the course duration) from certificate courses offered by the college.

- 2. The student must successfully complete the course. These credits must be approved by the Course Coordinators.
- 3. Students who undertake summer projects/ internships/ training in institutions of repute through a national selection process, will get 2 credits for each such activity. This must be done under the supervision of the concerned faculty/mentor.

Note:

- 1. The respective documents should be submitted within 10 days after completion of Semester End Examination.
- 2. No credits can be granted for organizing or for serving as office bearers/ volunteers for Inter-Class / Associations / Sports / Social Service activities.
- 3. The office bearers and volunteers may be given a letter of appreciation by the respective staff coordinators. Besides, no credits can be claimed for any services/activities conducted or attended within the college.
- 4. All claims for the credits by the students should be made and approved by the mentor in the same academic year of completing the activity.
- 5. Any grievances of denial/rejection of credits should be addressed to Additional Credits Coordinator in the same academic year.
- 6. Students having a shortage of additional credits at the end of the third year can meet the Additional Credits Coordinator, who will provide the right advice on the activities that can help them earn credits required for graduation.

Rajarshi Shahu Mahavidyalaya, Latur

(Autonomous)

Examination Framework

Theory:

40% Continuous Assessment Tests (CATs) and 60% Semester End Examination (SEE)

Practical:

50% Continuous Assessment Tests (CATs) and 50% Semester End Examination (SEE)

Course	Marks	CAT & Mid Term Theory				CAT Practical		Best Scored CAT & Mid Term	SEE	Total
		3			4					
1	2	Att.	CAT	Mid	CAT	Att.	CAT	5	6	5 + 6
			Ι	Term	Π					
DSC/DSE/	100	10	10	20	10	-	-	40	60	100
GE/OE/Minor										
DSC	75	05	10	15	10	-	-	30	45	75
Lab	50	-	-	-	-	05	20	-	25	50
Course/AIPC/										
OJT/FP										
VSC/SEC/	50	05	05	10	05	-	-	20	30	50
AEC/VEC/CC										

Note:

- 1. All Internal Exams are compulsory
- 2. Out of 02 CATs best score will be considered
- Mid Term Exam will be conducted by the Exam Section
- 4. Mid Term Exam is of Objective nature (MCQ)
- 5. Semester End Exam is of descriptive in nature (Long & Short Answer)
- 6. CAT Practical (20 Marks): Lab Journal (Record Book) 10 Marks, Overall Performance 10 Marks.
